Dating APPLICATIONSystem Requirements Specification

1 Project Abstract

Dating Application is Spring boot RESTful application with MySQL, where it allows Users to find matches, likes and dislikes the profiles based on the interests of the other users.

Following is the requirement specifications:

| | Dating Application |
|----------------------------------|---|
| | Parting Application |
| Modules | |
| 1 | User |
| 2 | Interests |
| 3 | Match |
| 4 | Like |
| 5 | Dislike |
| | |
| User Module | |
| Functionalities | |
| | |
| 1 | Can register Itself |
| 2 | Can Update Itself |
| 3 | Can Delete Itself |
| 4 | Can get the User by Id |
| 5 | Can Get all the Users |
| | |
| Interests Module Functionalities | |
| 1 | User can create Interests |
| 2 | User can update Interests |
| 3 | User can delete the Interests |
| 4 | User can get the interests-by-Interests Id |
| 5 | User can get the interests by User id |
| | oser can get the interests by oser id |
| | |
| Match Module | |
| Functionalities | |
| 1 | User can get all the matches |
| 2 | User can create a match |
| 3 | User can get Potential matches based on Age, Gender, City and Country |
| | |
| Likes Module | |
| Functionalities | |
| 1 | User can get all the Likes |

| 2 | User add a like | |
|-----------------|-------------------------------|--|
| | | |
| Dislikes Module | | |
| Functionalities | | |
| 1 | User can get all the dislikes | |
| 2 | User can add a dislike | |
| | | |

2 Assumptions, Dependencies, Risks / Constraints

2.1 USER CONSTRAINTS:

- While deleting the user, if the user id does not exist then the operation should throw a custom exception.
- While getting the user by id, if user id does not exist then the operation should throw a custom exception.

2.2 Interests Constraints

- While deleting the interests by user, if interest id does not exist then operation should throw custom exception.
- While getting the interests by user, if interest does not exist then operation should throw custom exception.

2.3 MATCH CONSTRAINTS

 While matching the profile, if the match id does not exist then the operation should throw a custom exception.

2.4 LIKE CONSTRAINTS

 While getting all the likes by user, if user id does not exist then operation should throw custom exception.

2.5 DISLIKE CONSTRAINTS

 While getting all the dislikes by user, if user id does not exist then operation should throw custom exception

Common Constraints

- For all rest endpoints receiving @RequestBody, validation check must be done and must throw custom exception if data is invalid
- All the business validations must be implemented in model classes only.
- All the database operations must be implemented on entity object only
- Do not change, add, remove any existing methods in service layer
- In Repository interfaces, custom methods can be added as per requirements.
- All RestEndpoint methods and Exception Handlers must return data wrapped in ResponseEntity

3 Business Validations

- User name is not null, min 3 and max 100 characters.
- User age is not null, min age is 18 and max age is 60.
- User email is not null, min 3 and max 100 characters and in proper email format.
- User Phone Number is not null, min 10 and max 10 digits.
- User gender is not null
- User city is not null
- User country is not null
- Interests interestedIn is not null, min 3 and max 100 characters
- Interests notInterestedIn is not null, min 3 and max 100 characters
- Interests hobbies are a List and is not null
- Interests profileUrl is not null
- Interests about is not null, min 3 and max 100 characters

4 REST ENDPOINTS

Rest End-points to be exposed in the controller along with method details for the same to be created

4.1 USERRESTCONTROLLER

| URL Exposed | | Purpose |
|------------------|--------------------------|--|
| 1. /users | | Register a User |
| Http Method | POST | |
| Parameter 1 | UserDto | |
| Return | UserDto | |
| | | |
| /users | 1 | Update a User |
| Http Method | PUT | |
| Parameter 1 | UserDto | |
| Return | UserDto | |
| | | |
| /users | - | Fetches the list of all registered Users |
| Http Method | GET | |
| Parameter 1 | - | |
| Return | List <userdto></userdto> | |
| | | |
| /users/{userId} | 1 | Fetches the details of a user |
| Http Method | GET | |
| Parameter 1 | Long (userId) | |
| Return | UserDto | |
| | | |
| /users /{userId} | | Delete a User |
| Http Method | DELETE | |
| Parameter 1 | Long (userId) | |
| Return | UserDto | |
| | | |

4.2 INTERESTS REST CONTROLLER

| URL Exposed | | | Purpose |
|-------------|--------------|---------|--------------------------|
| /interests | | <u></u> | User adds an Interest |
| Http Method | POST | | |
| Parameter 1 | InterestsDto | | |
| Return | InterestsDto | | |
| | | | |
| /interests | | | User updates an interest |
| Http Method | PUT | | |
| Parameter 1 | InterestsDto | | |
| Return | InterestsDto | | |
| | | | |

| /interests/{interestId} | | _ | Fetches details of Interests |
|-------------------------|---------------------|---|----------------------------------|
| Http Method | GET | | based on interestId |
| Parameter 1 | Long (interestId) | | |
| Return | InterestsDto | | |
| | | | |
| /interests/by-user-id/{ | userld} | _ | Fetches details of all interests |
| Http Method | GET | | based on the userId |
| Parameter 1 | Long (userId) | | |
| Return | List< InterestsDto> | | |
| | | | |
| /interests/{interestId} | | _ | Deletes the interest based on |
| Http Method | DELETE | | interestId |
| Parameter 1 | Long (interestId) | | |
| Return | Boolean | | |
| | | | |

4.3 MATCHRESTCONTROLLER

| URL Exposed | | | Purpose |
|------------------------------------|-----------------------------|---|-------------------------------|
| /match/{userId} | | | Fetches all matches based on |
| Http Method GET | | | userId or matchedUserId |
| Parameter 1 Long (userId) | | | |
| Return List <matchdto></matchdto> | | | |
| | | _ | |
| /match/{userId} | Fetches all the users based | | |
| Http Method POST | | | on the potential matches like |
| Parameter 1 Long (userId) | | | based on Age, Gender, City or |
| Parameter 2 List <filter></filter> | | | Country |
| Return List <userdto></userdto> | | | |
| | | _ | |

4.4 LIKESRESTCONTROLLER

| URL Exposed | | | Purpose |
|---------------------------------|---------------|--|---------------------------------|
| /likes/{userId} | | | Fetches list of likes based on |
| Http Method | GET | | userId |
| Parameter 1 | Long (userId) | | |
| Return List <likedto></likedto> | | | |
| | | | |
| /likes | | | Adds a like to the user profile |
| Http Method | POST | | |
| Parameter 1 | LikeDto | | |
| Return LikeDto | | | |
| | | | |

4.5 DISLIKESRESTCONTROLLER

| URL Exposed | | | Purpose |
|---------------------------------------|---------------|---|--------------------------------|
| /dislikes/{userId} | | | Fetches list of dislikes based |
| Http Method | GET | | on userId |
| Parameter 1 | Long (userId) | | |
| Return List <dislikedto></dislikedto> | | | Fetches list of dislikes based |
| | | - | |
| /dislikes | | | Adds a dislike to the user |
| Http Method | POST | | profile |
| Parameter 1 | DislikeDto | | |
| Return DislikeDto | | | |
| | | - | |

5.1 PACKAGE: COM.IIHT.TRAINING.DATINGAPP

Resources

| DatingApplication(Class) | This is the Spring Boot starter | Already Implemented |
|--------------------------|---------------------------------|---------------------|
| | class of the application. | |

5.2 PACKAGE: COM.IIHT.TRAINING.DATINGAPP.ENTITY

| Class/Interface | Description | Status |
|------------------|---|--------|
| User (class) | o Annotate this class w proper annotation to declare it as an entity class with userId as primary key. o Map this class with userId table. o Generate the userId using IDENTITY strate | ser |
| Interests(class) | o This class is partially implemented. o Annotate this class w proper annotation to declare it as an entity class with interestId a primary key. o Map this class with interests table. o Generate the interestId using the IDENTITY strategy | as |
| Match(class) | o This class is partially implemented. o Annotate this class w proper annotation to declare it as an entity class with Id as prima key. o Map this class with match table. o Generate the Id using the IDENTITY strategy | ry |

| Like(class) | 0 | This class is partially implemented. | Partially implemented. |
|----------------|---|--------------------------------------|------------------------|
| | 0 | Annotate this class with | |
| | | proper annotation to | |
| | | declare it as an entity | |
| | | class with Id as primary | |
| | | key. | |
| | 0 | Map this class with likes | |
| | | table. | |
| | 0 | Generate the Id using | |
| | | the IDENTITY strategy | |
| Dislike(class) | 0 | This class is partially implemented. | Partially implemented |
| | 0 | Annotate this class with | |
| | | proper annotation to | |
| | | declare it as an entity | |
| | | class with Id as primary | |
| | | key. | |
| | 0 | Map this class with | |
| | | dislikes table. | |
| | О | Generate the Id using | |
| | | the IDENTITY strategy | |
| | | | |

5.3 Package: com.iiht.training.datingapp.dto

| Class/Interface | Description | Status |
|----------------------|---|------------------------|
| UserDto (class) | Use appropriate annotations from | Partially implemented. |
| | the Java Bean Validation API for | |
| | validating attributes of this class. | |
| | (Refer Business Validation section | |
| | for validation rules). | |
| | | |
| InterestsDto (class) | Use appropriate annotations from | Partially implemented. |
| | the Java Bean Validation API for | |
| | validating attributes of this class. | |
| | (Refer Business Validation section | |
| | for validation rules). | |

| MatchDto (class) | Use appropriate annotations from | Partially implemented. |
|--------------------|---|------------------------|
| | the Java Bean Validation API for | |
| | validating attributes of this class. | |
| | (Refer Business Validation section | |
| | for validation rules). | |
| | | |
| LikeDto (class) | Use appropriate annotations from | Partially implemented. |
| | the Java Bean Validation API for | |
| | validating attributes of this class. | |
| | (Refer Business Validation section | |
| | for validation rules). | |
| DislikeDto (class) | Use appropriate annotations from | Partially implemented. |
| | the Java Bean Validation API for | |
| | validating attributes of this class. | |
| | (Refer Business Validation section | |
| | for validation rules). | |
| | | |

5.4 Package: com.iiht.training.datingapp.filter

| Class/Interface | Description | Status |
|---------------------|--------------------------------------|----------------------|
| Filter (class) | Object of this class is supposed to | Already implemented. |
| | return the filter based on the Age, | |
| | Gender, City and Country | |
| FilterUtils (class) | This class is supposed to return the | Already implemented. |
| | list of users based on the Age, | |
| | Gender, City and Country | |

5.5 PACKAGE: COM.IIHT.TRAINING.DATINGAPP.MODEL.EXCEPTION

Resources

| Class/Interface | Description | Status |
|---------------------------|--|----------------------|
| ExceptionResponse (class) | Object of this class is supposed to be | Already implemented. |
| | returned in case of exception through exception handlers | |

5.6 PACKAGE: COM.IIHT.TRAINING.DATINGAPP.REPOSITORY

| Class/Interface | | Description | Status |
|------------------------------------|----|--|-----------------------|
| UserRepository (interface) | 1. | Repository interface exposing CRUD functionality for User Entity. | Partially implemented |
| | 2. | You can go ahead and add any custom methods as per requirements | |
| InterestsRepository (interface) | | Repository interface exposing CRUD functionality for Interests Entity. You can go ahead and add any custom methods as per requirements | Partially implemented |
| MatchRepository (interface) | 1. | Repository interface exposing the endpoints for getting all the matches, save a match and find potential matches functionality for Match Entity. You can go ahead and add any custom methods as per requirements | Partially implemented |

| LikesRepository (interface) | Repository interface exposing the endpoints for getting all likes by a user and save likes functionality for Like Entity. You can go ahead and add any custom methods as per requirements |
|-----------------------------------|---|
| DislikesRepository (interface) | Repository interface exposing the endpoints for getting all dislikes by a user and save dislikes functionality for Dislike Entity. You can go ahead and add any custom methods as per requirements |

5.7 Package: com.iiht.training.datingapp.service

| Class/Interface | Description | Status |
|-------------------------|--|----------------------|
| UserService (interface) | Interface to expose method | Already implemented. |
| | signatures for user related functionality. | |
| | · | |
| | Do not modify, add or delete any | |
| | method | |
| | | |
| InterestsService | Interface to expose method | Already implemented. |
| (interface) | signatures for User interests related | |
| | functionality. | |
| | Do not modify, add or delete any | |
| | method | |
| | | |

| MatchService (interface) | Interface to expose metho | d Already implemented. |
|-----------------------------|----------------------------------|------------------------|
| | signatures for Match relate | d |
| | functionality. | |
| | Do not modify, add or delete ar | у |
| | method | |
| | | |
| LikesService (interface) | Interface to expose metho | d Already implemented. |
| | signatures for Likes relate | d |
| | functionality. | |
| | Do not modify, add or delete ar | у |
| | method | |
| | | |
| DislikesService (interface) | Interface to expose metho | d Already implemented. |
| | signatures for dislikes relate | d |
| | functionality. | |
| | Do not modify, add or delete ar | у |
| | method | |
| | | |
| LocationServiceApi | Interface to expose metho | d Already implemented. |
| (interface) | signature for User filter relate | d |
| | functionality. | |
| | Do not modify, add or delete ar | у |
| | method | |
| | | |

5.8 PACKAGE: COM.IIHT.TRAINING.DATINGAPP.SERVICE.IMPL

| Class/Interface | Description Status |
|-------------------------|--|
| UserServiceImpl (class) | • Implements UserService . To be implemented. |
| | Contains template method |
| | implementation. |

| | Need to provide implementation for user related functionalities Add required repository dependency Do not modify, add or delete any method signature | |
|---------------------------------|--|--------------------|
| InterestsServiceImpl (class) | Implements InterestsService. Contains template method implementation. Need to provide implementation for user interests related functionalities Add required repository dependency Do not modify, add or delete any method signature | To be implemented. |
| MatchServiceImpl (class) | Implements MatchService. Contains template method implementation. Need to provide implementation for user matches related functionalities Add required repository dependency Do not modify, add or delete any method signature | To be implemented. |

| LikesServiceImpl (class) | • Implements LikesService . | To be implemented. |
|-----------------------------|--|----------------------|
| | Contains template method | |
| | implementation. | |
| | • Need to provide | |
| | implementation for user likes | |
| | related functionalities | |
| | • Add required repository | |
| | dependency | |
| | • Do not modify, add or delete | |
| | any method signature | |
| DislikesServiceImpl (class) | • Implements DislikesService . | To be implemented. |
| | Contains template method | |
| | implementation. | |
| | • Need to provide | |
| | implementation for user | |
| | disllikes related | |
| | functionalities | |
| | Add required repository | |
| | dependency | |
| | Do not modify, add or delete | |
| | any method signature | |
| LocationServiceApiImpl | Implements | Already implemented. |
| (class) | LocationServiceApi. Contains | |
| | template method | |
| | implementation. | |
| | Need to provide | |
| | implementation for user filter | |
| | related functionalities | |
| | Add required repository | |
| | dependency | |
| | Do not modify, add or delete | |
| | any method signature | |

5.9 PACKAGE: COM.IIHT.TRAINING.DATINGAPP.EXCEPTION

| Class/Interface | Description | Status |
|-----------------------|---------------------------------|------------------------|
| GlobalHandler (class) | • RestControllerAdvice Class | Partially implemented. |
| | for defining global exception | |
| | handlers. | |
| | • Contains Exception Handler | |
| | for InvalidDataException | |
| | class. | |
| | • Use this as a reference for | |
| | creating exception handler | |
| | for other custom exception | |
| | classes | |
| | | |
| | | |

| Class/Interface | Description | Status |
|---------------------------------------|-------------------------------|------------------|
| UserNotFoundException (Class) | • Custom Exception to be | Already created. |
| | thrown when trying to | |
| | fetch or delete the info of a | |
| | user which does not exist. | |
| | • Need to create Exception | |
| | Handler for same wherever | |
| | needed (local or global) | |
| InterestsNotFoundException (Class) | • Custom Exception to be | Already created. |
| | thrown when trying to | |
| | fetch or delete interests of | |
| | the user if interest does not | |
| | exist. | |
| | • Need to create Exception | |
| | Handler for same wherever | |
| | needed (local or global) | |

| MatchNotFoundException (Class) | Custom Exception to be Already created. thrown when a match for |
|--------------------------------|--|
| | the user is not found for a |
| | specific user id. |
| | Need to create Exception |
| | Handler for same wherever |
| | needed (local or global) |

5.10 PACKAGE: COM.IIHT.TRAINING.DATINGAPP.CONTROLLER

| Class/Interface | Description | Status |
|-----------------------------|--|-------------------|
| UserRestController (Class) | Controller class to expose all | To be implemented |
| | rest-endpoints for user | |
| | related activities. | |
| | May also contain local | |
| | exception handler methods | |
| InterestsRestController | Controller class to expose all | To be implemented |
| (Class) | rest-endpoints for user | |
| | interests related activities. | |
| | May also contain local | |
| | exception handler methods | |
| MatchRestController | Controller class to expose all | To be implemented |
| (Class) | rest-endpoints for profile | |
| | match related activities. | |
| | May also contain local | |
| | exception handler methods | |
| LikesRestController (Class) | Controller class to expose all | To be implemented |
| | rest-endpoints for user-like | |
| | related activities. | |
| | • May also contain local | |
| | exception handler methods | |

| DislikesRestController | Controller class to expose all To be implemented |
|------------------------|--|
| (Class) | rest-endpoints for user dislike |
| | related activities. |
| | May also contain local |
| | exception handler methods |

6 Considerations

- A. There is only one Role of possible value
 - 1. User
- B. The user can perform the following 4 possible actions

| Interests |
|-----------------|
| Profile Match |
| Profile Like |
| Profile Dislike |

7 Execution Steps to Follow

- 1. All actions like build, compile, running application, running test cases will be through Command Terminal.
- To open the command terminal the test takers, need to go to Application menu (Three horizontal lines at left top) -> Terminal -> New Terminal.
- 3. To build your project and run test cases use command:

mvn clean package

4. To launch your application, move into the target folder (cd target). Run the following command to run the application:

java -jar DatingApplication-0.0.1-SNAPSHOT.jar

- 5. This editor Auto Saves the code
- 6. If you want to exit(logout) and continue the coding later anytime (using Save & Exit option on Assessment Landing Page) then you need to use CTRL+Shift+B-command compulsorily on code IDE. This will push or save the updated contents in the internal git/repository. Else the code will not be available in the next login.

- 7. These are time bound assessments the timer would stop if you logout and while logging in back using the same credentials the timer would resume from the same time it was stopped from the previous logout.
- 8. To test any Restful application, the last option on the left panel of IDE, you can find ThunderClient, which is the lightweight equivalent of POSTMAN.
- 9. This is a web-based application, to run the application on a browser, use the internal browser in the workspace. Click on the second last option on the left panel of IDE, you can find Browser Preview, where you can launch the application.

Note: The application will not run in the local browser

- 10. Default credentials for MySQL:
 - a. Username: root
 - b. Password: pass@word1
- 11. To login to mysql instance: Open new terminal and use following command:
 - a. sudo systemctl enable mysql
 - b. sudo systemctl start mysql
 - c. mysql -u root -p

The last command will ask for password which is 'pass@word1'

12. Mandatory: Before final submission run the following command:

mvn test

13. You need to use CTRL+Shift+B - command compulsorily on code IDE, before final submission as well. This will push or save the updated contents in the internal git/repository, and will be used to evaluate the code quality.
